

ARCHITECTURAL GRADE PVC PRODUCTS

BRACES

Whether under eaves, porticos, pergolas, or connecting gazebo posts to the roof, braces add the perfect amount of architectural appeal. We can do any size and any design.

CORBELS

Contemporary or traditional, interior or exterior, big or small, our new line of Architectural-Grade PVC corbels provides the perfect solution for those projects that can't use off-the-shelf products.

GABLE BRACKETS

Traditionally cut, assembled, and made out of wood on the job site, our new line of Architectural PVC gable brackets allows you to design and order a fully-assembled gable bracket that is built to your exact specifications. This bracket is easy to install and will last forever.

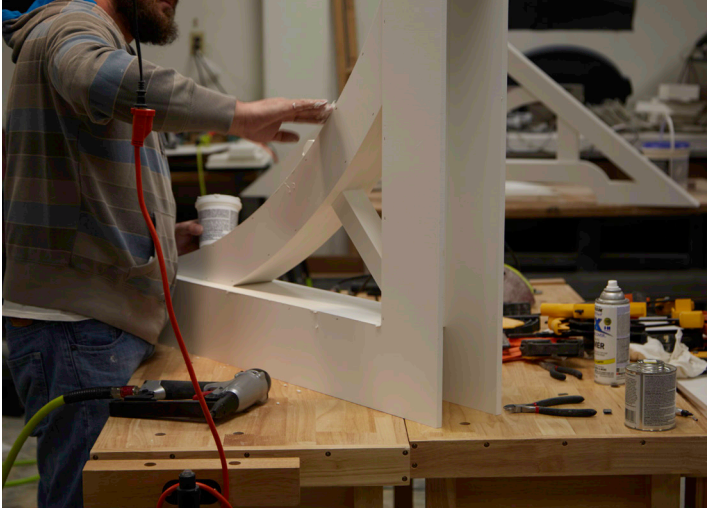

BRACKETS

Fully customizable width, depth, height and design allows you to have the perfect bracket for your project. When you need something longer-lasting than wood and no standard item will fit, this bracket offering is the perfect choice.

ARCHITECTURAL GRADE PVC PRODUCTS

WHY ARCHITECTURAL PVC?

Architectural Grade PVC is moisture proof, insect resistant, and comes with a lifetime warranty while still featuring the characteristics of true woodworking products that fine builders and craftsmen desire. Choose from our standard styles, design your own, or have us copy a historical pattern. This product is limited only by your imagination.

EASY TO INSTALL

We have three manufacturing methods, each designed for different applications. Whether you need the bracket hollow, closed in, or completely solid, our PVC products are designed for easy installation in any application.

BEAUTIFUL

While Architectural PVC readily accept paints, it comes in a crisp, matte white finish. It is protected with UV inhibitors, making it resistant to fading or yellowing over time. Able to be milled, shaped, and moulded, this product line is precision manufactured using the latest technology and then hand-sanded for a clean, crisp finish.
